Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/28/05 has been entered.

Allowable Subject Matter

Claims 1-17 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or render obvious a polishing machine for a peripheral edge of a semiconductor wafer comprising: a rotary mechanism for holding a semiconductor wafer while rotating it in a prescribed direction; a rotary body which rotates relative to the semiconductor wafer while maintaining a prescribed gap from a periphery of the semiconductor wafer, having a rotary axis which is set in the same direction as the rotary axis of the semiconductor wafer so that the rotary body and the semiconductor wafer are not in contact with each other during a complete polishing process; a polishing solution channel for channeling the flow of polishing solution to the gap and a polishing solution supply portion for supplying the polishing solution to the polishing solution channel; wherein the polishing solution is drawn into the gap between the peripheral edge of the semiconductor wafer and the rotary body, and polishing abrasive particles in the polishing solution collide with the peripheral edge the semiconductor wafer to conduct non-contact polishing of the peripheral edge of the semiconductor wafer.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberts Culbert whose telephone number is (571) 272-1433. The examiner can normally be reached on Monday-Friday (7:30-4:00).
